

The new generation multifunctional stove is entirely smoke free. The stove is manufactured of stainless steel and has a 9,2 kW gas burner that will heat the sauna in just minutes. It is corrosion protected throughout, which makes it possible to use sea water for both steaming and washing.

The gas heater has a stepless regulation of the flame, this makes it easy to choose the desired temperature.

CE-made to European standard and fills all safety regulations.

**Gas stove measures H55cm D= 39cm +the burner extends 18 cm**

**Water tank 3,5 litres, weight 40 kg (with steam stones 55 kg)**

**LPG (Liquefied petroleum gas) usage on full effect 669 g./hour**

**The burner is optimized for spaces below 8m<sup>3</sup>**
